

Ravelry.com

Ravelry.com is a social network and virtual notebook for knitting fiends, crochet masters and yarn lovers! Grab your needles, hooks and fiber of choice and take a look at what Ravelry has to offer.

1. **Discover new patterns.** Ravelry.com users have uploaded over 100,000 patterns and projects onto the site – a huge number of which are free!
2. **Add projects to your notebook.** Take pictures of your current projects, link them to the pattern you are using, and let others see what you are accomplishing!
3. **Find yarn and fibre companies!** Read user reviews before purchasing a new fibre online. Search by type, brand, or even location of seller.
4. **“Favourite” patterns.** Ravelry makes it easy to keep track of projects you hope to make someday!

5. **Join groups and circles!** Ravelry features user-made groups for any type of person under the sun. From “Team Yarn” – a group who provides knit and crochet goods for those fighting cancer – to “Due in August 2013” – a group for those expecting a baby in August of 2013. Groups provide a forum for discussion, a place to share experiences, patterns and ask questions.

6. **Connect with other users!** Discuss the project you are working on with other users who are working on the same project! Whether you admire from afar and refrain from commenting, or a social butterfly who messages other users constantly, it's okay. Ravelry is open for all comfort and experience levels.
